➤ HERE ARE OUR INITIATIVES ➤

Being aware that natural wildlife and waste management facility are the prerequisites for Laos's sustainable future, we orient our support to these directions by:

Donations to the Mekong Elephant Park:

The Mekong Elephant Park is a non-riding elephant preservation sanctuary in Pakbeng whose ambitions are to preserve elephants—a cultural symbol of Laos that are in danger and promote livelihoods for the elephant keepers—the mahouts.

* ENVIRONMENTAL RESPONSIBILITY *

The Sanctuary Nam Ngum Beach Resort acknowledges that tourism can bring adverse effects by its very nature. **Protecting the environment is a key part of our commitment to environmental sustainability.** In order to reduce our environmental impact, we have **implemented initiatives and work alongside partners** to proactively play our part in reducing our environmental footprint.

We are engaged in a process to reduce our environmental footprint through different channels and in an all side approach:

More than 90% lighting system in the resort is LED lighting. We monitor Energy consumption and have a plan for energy reduction in the next 2 years by step-by-step purchase of technology-based equipments, responsible equipment maintenance.

Prioritise waste prevention by:

- Refill water policy: No more plastic bottles in the rooms. Refill station are available everywhere in the hotel for free.
- Regularly implement food audit in the kitchen to prevent food from being spoiled. We practice FIFO (first in first out) principle to prepare dishes, so long as this fits customer's preference
- A better purchase policy: Reduce plastic packaging by buying in bulk; train our purchaser to choose wisely between needs and plastic free items whenever pricing condition allows.

Implement waste segregation and close the loop on separated waste whenever possible:

- Try as much as possible to find off-takers for all waste streams: we collect and send plastic bottles, containers of cooking oil and cans by informal sector, food waste for animal feeding, used cooking oil to outside vendor.

Properly manage hazardous waste

- Hazardous waste like light bulbs which have not been able to send to an authorised place are stored properly. We collect old batteries and continue to find a place to send to for recycling.
- Chemicals like Chlorine are stored in a designated and restricted area.

**BUY LOCALLY,
BUY GREEN:**

Products and
services of local
origin are
preferred.

Use of natural
cleaning
products using
biotechnology.

We educate our suppliers on sustainability practices, and are working with local organizations whose objective is to reduce the environmental effect tourism can play on local communities. Communication to our valued guests and employees are provided within our rooms and common areas about our actions to reduce energy, water and waste.

* PLASTIC WASTE REDUCTION *

The Sanctuary Nam Ngum Beach Resort aims **to be a leader in the field of plastic consumption reduction** and has become a proud partner of the **Refillable Bottles Initiative**. We wish for our clients to leave a positive footprint within the country and act towards one of the biggest environmental dilemmas in Asia Pacific today.

Within this field of action, guests may now purchase a refillable bottle at the hotel -or bring one of their own- as to limit single-use plastic bottles and **use freely our refill water stations**.

Despite the fragmented supply chain, we tried our best to replace single use plastic amenities in rooms and in the restaurants with alternatives from other materials like bamboo. Use of cling film for food wrapping in unavoidable cases is taken seriously for reduction by monitoring cling film's consumption and changing staff' practices. We have started take-back program to exchange reusable containers with suppliers and aim to reduce plastic packaging by 40% in 2024.
